

RELIGION VITAL TO EDUCATION SPEAKER STATES

Mrs. MacKenzie Stresses Its Value in Talk to Seward School P.T.—Mrs. Edward Boyle Chosen Club President

"Teach the child to get along with God and he will get along with people," said Mrs. Donald H. MacKenzie, speaking at the regular monthly meeting of the Seward School Parent Teacher Association Wednesday afternoon in the school auditorium.

Mrs. MacKenzie's topic was "Religion As A Stabilizing Factor In the Home." Mrs. MacKenzie declared that "in the world today parents have ignored the tremendous importance of teaching religion in the home."

She stated that the home must begin the preparation for adult life and character, and that "the future of America rests with the religious home life of its children." Mrs. MacKenzie declared that "from 17 to 25 million American boys and girls have no contact with any religion." She closed by saying that "hand in hand with the home marches the Christian Church, an agency which holds the world together and keeps it from disintegration."

The business meeting, presided over by Mrs. Edward Boyle, opened with the singing of "The Star-Spangled Banner." The various reports were read and the association voted to buy a \$100 Defense Bond with money from a dental fund started years ago by the Seward P.T.A. The association also voted to sponsor a Cub Pack for next year.

A letter from Dr. C. G. Hetherington, city school superintendent, was read by Mrs. Boyle. Doctor Hetherington thanked the parents for helping with the sugar rationing and the gas rationing which was done in public schools.

Mrs. Anton Lind gave a report of the Cornell Institute meeting held at Ithaca April 13 to 16 and also a report of the Finger Lakes Conference at Seneca Falls.

The annual election of officers was held and the following slate elected for next year: President, Mrs. Edward Boyle; first vice president, Mrs. Anton Lind; second vice president, Mrs. William Wenz; third vice president, Mrs. William Foote; recording secretary, Mrs. Robert Hannon; corresponding secretary, Mrs. Hester Ross.

Mrs. Boyle thanked the parents, teachers and officers for their cooperation throughout the year.

Miss Donohue thanked the officers and the members of the P.T.A. for the many things they had accomplished for the school children during the year. Mrs. Fred Wilson was hostess for the meeting assisted by mothers of fifth grade pupils and Mrs. Agnes Crowley. Refreshments were served and a bake sale was held following the meeting, in charge of Mrs. Joseph Long.

LEADERS OF GIRL SCOUTS ELECT, PLAN CAMP DAY

The Girl Scout Leaders Association elected the following new officers at their regular May meeting: Mrs. Frank Mitchell, leader Seward School troop No. 15, president; Miss Bernice Stubbs, assistant leader Senior Troop No. 14, vice president; Mrs. William T. Rives, leader Thompson Memorial Church Troop No. 11, recording secretary; Miss Stephanie Myrick, assistant leader of the Senior Girl Scout Troop No. 9, corresponding secretary; Mrs. C. H. Best, leader Seward

School Browns Troop No. 14, treasurer; and Mrs. Alberta Beatty, assistant leader Fulton School Troop No. 33, program chairman.

Following dinner in the Woman's Union cafeteria it was decided to have the annual Camp Edge-water Day outing for all troops, Intermediate and Senior Girl Scouts, on June 6. As a part of this day's program the senior girls will be presented with their Senior Service Scout awards for which they have been working during the past year. Miss Martha C. Wright, executive secretary, reported on the Regional Girl Scout Conference she attended in Albany. The outgoing officers: Mrs. Ida Casper, president; Mrs. Frank Mitchell, vice president; and Mrs. Norman K. Spencer, secretary-treasurer, received a vote of thanks.

The Browns Troop leaders decided to have a picnic for all Browns Girls Scouts in the city at Hoopes Park on June 4.

Navy Worker Is Inventor
Mare Island Navy Yard, Cal.—(UPI)—William J. Linday, a member of the supply department's carpenter shop, has invented a gadget that will roll wire onto a spool and count its footage at the same time. Formerly the wire had to be rolled onto a spool by hand and its footage counted by the "roller."

The Imperial palace is in the center of the city of Tokyo.

What It Means

The Bombing Threat to America

By JOHN GROGAN

Can the United States be bombed from the air? Will the United States be bombed?

The first question can be answered by the fact that it has been bombed.

The second calls for qualifications. All military operations have a definite purpose. The purpose of aerial bombardment of America would be the destruction of civilian morale and effectiveness.

The first objective might be attempted with night knockdown planes carried by submarines. The Axis also might attempt to sneak a plane tender past the Atlantic patrol.

Resistance Value Only

The weight of bombs these planes could carry would be insignificant. There is grave doubt that the objective could be attained. Experience in this war has shown that a sprinkling of light bombs is ineffectual in destroying civilian morale. Indeed, it has had the effect of unifying the populace and actually increasing the war effort.

As for the second objective, the two bombing techniques proved most successful are: (1) Pulverizing a whole city, as Rostock; (2) Destruction of specific and vitally important factories, as the diesel engine plant at Augsburg. Both require action by the biggest bombers, in force.

It's roughly 4,000 miles from Narvik, Norway, to Seattle, air line (closer than from Tokyo). From Boston to Rostock is about 3,150 miles. Bergen, Norway, is about 3,700 miles. These distances to the north Pacific, northeast coast and midlands industrial centers are within the total range of four-motored bombers. Conceivably, the planes could fly to the target areas, but they couldn't get back.

Expense Is An Item
Every plane starting this mission would have to be written off as a total loss, and bombers like that hit the bill for \$350,000 a copy. All the highly trained bomber crews likewise would be lost.

In addition, plane losses increase with distance flown. The

he turned over to the Cayuga County United War Fund.

The Barnstormers Orchestra, which has been playing regularly for the round and square dancing, will donate its services, as will the lodge committee and all regular employees. There will be no admission charged and the public is being invited to attend. An opportunity will be given all present to donate to the War Fund.

An invitation has been extended to Lloyd S. Rifford, chairman of the War Fund Committee, and to Edwin P. Metcalf and Edward T. Boyle, co-directors to be on hand to receive the donations.

The Hardenburgh Lodge Committee in charge of the dance is headed by Donald M. Van Denburgh and includes C. B. Clark, Richard Harold, Sr., R. W. Holmberg, Fred McCrea, B. A. Mohr, E. M. Sambrook, M. A. Tahan, O. W. Tyler, James Wadsworth, A. C. Wallace, A. E. Wallace, Hayden Carner and Alfred Williams. Glenn F. Mosher is noble grand of the lodge.

The large dance floor will be especially decorated for the occasion.

UNITED WAR FUND TO GET TEMPLE DANCE PROCEEDS

Hardenburgh Lodge, No. 748, of Odd Fellows, has been conducting a dance at the Odd Fellows Temple, 40 State Street, every Saturday night since last fall. This Saturday night the entire proceeds will

CORAL STONES USED TO BUILD UNIQUE HOUSE

Miami, Fla.—(UPI)—A domicile of hand-carved coral rock made of 15-ton slabs of coral rock, with gargantuan doors and all-stone furniture—is being built here by Ed Leedskalnin.

The 46-year-old Latvian weighs but 121 pounds, but he does all his work without mechanical aid or anything but "muscle" power. He has hoisted huge slabs as high as 50 feet in the air, and balanced five and 10-ton stones so delicately a child can turn a table, rock a chair, or revolve a giant stone.

"I do it the same way the old Egyptians built their pyramids," he said. His only tools are a rock axe, crowbar, sledge and an ingenious arrangement of levers.

Every object in Leedskalnin's stone age yard serves a utilitarian purpose. There's a stone cradle in solid rock—and it rocks like a charm. He has twin beds carved from stone, with a bath right alongside, and his giant sun dial's accuracy is unquestionable. An elevated fish pond, a circular lounge pivoted to turn to any angle for sun bath or shade, and a massive orchestra stand, however, are all dwarfed by two giant monoliths, weighing more than 30,000 pounds each. Facing east and tipped with a monster star and crescent moon, respectively, these pillars also were quarried by hand.
